

MULTI VIBRATORS USING TRANSISTORS

MODEL - MULO4

This board has been designed with a view to provide practical and experimental knowledge of Multivibrators on SINGLE PCB.

SPECIFICATIONS

1. Built-in Power supply : +9V at 200mA IC Regulated & short circuit protected
2. Power requirement : 230V, 50Hz AC.
3. Multivibrators Circuits :
Astable Multivibrator
Bistable Multivibrator
Monostable Multivibrator
3. Standard Accessories :
 1. A manual having practical details.
 2. Patch Cords.
4. Experiments: -
 1. To study the operation of Different Multivibrators.
 2. To observe the waveforms at various points.

In keeping view of SIGMA policy of continuous development and improvement, the Specifications may be changed without prior notice or obligation.
